### WAVIN TIGRIS K1 TOP OF THE CLASS

The Esker Education Together National School in Dublin was financed and constructed as part of the Department of Education and Skills' Rapid Build Programme. The two-storey build consisted of 16 classrooms, six support teaching classrooms, a hall, library, staff room, two ball courts, a play area and associated ancillary accommodation. Construction was completed within the planned 34-week timeline, in time for the

start of the next academic year. More than 1,200m of WAVIN Tigris K1 pipe was installed during a 16-week period. As Wavin Tigris K1 is a press-fit system, it features a lightweight, safe installation method that allowed the plumbing, soil and waste installation works to be completed on time.

### INTRODUCING THE BIG MAGIC THERMODYNAMIC BOX

Award winning company the MAGIC THERMODYNAMIC BOX COMPANY are proud to announce their new range of MCS approved Thermodynamic Solar Assisted Heat Pumps - The Big Magic Thermodynamic Box. The Magic Thermodynamic Box company are making history as they are the first and only British company to have MCS approved

Thermodynamic products. The company are proud to manufacture all of their products in the UK all of which are hand made by highly skilled engineers and since the companies opening four years ago are now being sold worldwide. The new range is an all in one integrated A-rated cylinder

that also combined the Thermodynamic Heat Pump inside it and an aluminium thermodynamic panel which can be installed anywhere on the outside or inside of the property. The system comes in two different sizes, 130 and 200 litres of water capacity however bespoke systems can be made to order.

The new system works as a standalone water heating system and heats your hot water 24 hours a day. The panel works in any weather conditions and without the need of a boiler, which saves on carbon emissions. This makes The Big Magic Thermodynamic Box a very green option for your environmentally friendly home. The system can provide the user with 100% of the users domestic hot water needs.

### XL HAS ALL THE RIGHT ATTRIBUTES

The XL Series is part of ATAG COMMERCIAL's highly efficient range of gas-fired boilers, boasting impressive performance, high quality and reliable engineering, plus flexible cascade arrangements. XL boilers are available in outputs of 60kw, 95kw and 120kw, with all models achieving best in class NOx emissions less than 30mg/kwh - offering maximum BREEAM points. Each XL Series commercial boiler incorporates an extremely efficient

and durable stainless steel heat exchanger. Its specially designed hydraulic chambers and smooth tubes ensure water turbulence is optimised for maximum heat transfer, while maintaining the lowest possible pressure drop.
