SNICKERS ON-SITE CLIMATE CONTROL WORKWEAR

From staying warm and dry, think about staying cool and dry and look for working clothes that excel at ventilation and moisture transport to keep you working comfortably wherever you are on site. That's why SNICKERS have incorporated 37.5° Technology fabric into its garments. It's very quick-drying material that captures and releases moisture vapour – like your sweat – for superior coolness and

dry working comfort. For the spring and summer months, Snickers have a range of shirts, jackets, shorts and trousers including Mechanical Air Flow™ features which are breathable openings in the garments and stretch mesh fabric for inside leg ventilation.

PURMO SUPPLIES 194 VERTICAL RADIATORS

Almost 200 PURMO Vertical radiators will be installed in Powis Place, new purpose-built student accommodation in the heart of Aberdeen. Powis Place was a vacant retail unit until Alumno Developments saw its potential for residential use. Work has now begun to transform the site into a modern six-storey student accommodation block for 196 students.

"This is a terrific project for us to

be part of," comments Kelly Smith, product manager for Purmo. "The Purmo range has been designed not only to provide ample warmth, but also to enhance the aesthetics of its surroundings and with the huge range of sizes available there is always a suitable option.

ECO FRIENDLY HOMES AT A FRACTION OF THE COST

The launch of the Zed Factory's ISince the company started 5 years ago as Magic Thermodynamic Box, the team based in Chelmsford, Essex has always been innovative with its hot water renewable energy and central heating energy saving products.

As an accredited and award winning company they are passionate about the science of 'Thermodynamics' and how this can be maximised in engineering.

By embracing the laws of Thermodynamics the company designs and manufactures these products in the UK and exporting them to the global market. Over the past 12 months the growth of the company across the globe has seen the need to build a more suitable brand, which is why earlier this year the Magic Box International brand was launched. With a growing distribution network worldwide reaching as far as New Zealand Magic Box International is seeing their range of hot water generating solar

3 IN 1 IN-VEHICLE TECHNOLOGY

Fire and security specialist Tecserv UK has installed an all-in-one Vehicle Tracking solution from mobile workforce management specialist BIGCHANGE across its entire fleet of vans. Headquartered in Underwood, Nottingham the company designs, installs and maintains commercial fire and intruder alarms, CCTV and access control systems for clients across the UK. After evaluating a number of providers, Tecserv UK chose the

JourneyWatch system from BigChange combining real-time tracking of vans, intelligent

separation of business and private mileage and an integrated driver mobile app that manages timesheets, expenses and gives its fully certified technicians feedback after each journey.

RINNAI BUILDS BUSINESS WITH O'NEIL'S

RINNAI, manufacturer of the Energysaver energy efficient range of gas fired wall heaters, recently pulled out all the stops in collaboration with Ayr-based installer O'Neil Gas Services to keep the congregation warm at St Mary's Church in Saltcoats, Ayrshire. "We choose Rinnai heaters because they are reliable, and easy to work on, as well as being efficient. O'Neil's use only the best as call backs can be expensive

and so installing the Rinnai heating range within commercial installations is an obvious choice," says O'Neil's installation manager Ross McWhirter. Six Rinnai 1004T units were installed at the church.
